

Appl. No. : 10/506,361
Filed : May 16, 2005

AMENDMENTS TO THE SPECIFICATION

Please replace paragraph 1 on page 4 of the specification with the following amended paragraph:

The ventilation valve 35 and the switch slide 27 are actuated by pivoting the control lever 50 because the eccentric shaft 51 is coupled with the switch slide 27, namely through the engagement of several bolts 29 which are displaceably inserted into axial slots 32 and are in connection with an outside ring slide 31. It comprises an annular groove into which the lower end of the eccentric shaft 51 engages. The entire switch unit 21 is rotatable about said ring slide 31 with the control lever 50.
